Steele Lane Underpass to be Completed Six Months Ahead of Schedule

The City of Santa Rosa is pleased to announce that Ghilotti Construction of Santa Rosa and MCM of Sacramento will be completing the widening of the Highway 101 Steele Lane underpass six months ahead of schedule. Completion of the underpass was originally planned for April 2008. The opening of the underpass comes just in time to ease traffic congestion during the holiday shopping season. The redesigned underpass will open Wednesday, November 21 with eight lanes including two left turn lanes for each direction.

The City of Santa Rosa wishes to thank Ghilotti Construction, MCM, Caltrans, the Sonoma County Transportation Authority, and especially the hardworking Ghilotti Construction field staff for seizing this opportunity to speed up the project and deliver this refurbished underpass just in time for the holidays.
