Water-Use Efficiency Checkup!

Free!

Helping Residential Utility Customers Use Water More Efficiently at Home

(707) 543-3985

What is a Water-Use Efficiency Checkup?

A Water-Use Efficiency Checkup is an on-site review of indoor and outdoor water use.

Water-Use Efficiency staff will review indoor water using appliances, check for leaks, measure the flow rates of all showerheads and faucets, and check toilet flush volumes.

The outdoor checkup will include an inspection of the irrigation controller, an audit of irrigation hardware, and a check for leaks and broken sprinklers.

Water-Use Efficiency Checkups are free to all residential utilities customers.

How Do I Get a Water-Use Efficiency Checkup?

It's Easy! If you are interested in scheduling a Water-Use Efficiency Checkup all you need to do is call the Water-Use Efficiency Hotline at (707) 543-3985.

The Water-Use Efficiency program offers checkups Monday through Friday.

So call to schedule your checkup today!

What Do I Get From a Water-Use Efficiency Checkup?

Staff will provide findings regarding current water use and make recommendations to the residential customer with regard to increasing water-use efficiency.

If current fixtures are not efficient, free showerheads and faucet aerators will be provided.

Educational materials and information on water-use efficiency rebates and incentives will also be included with the Water-Use Efficiency Checkup packet provided at the end of the checkup.
