

Commemorative Tree Program

*The City of Santa Rosa **Commemorative Tree Program** is a wonderful opportunity to recognize friends and family members or celebrate a special memory or occasion at a City park.*

Trees—A Living Tribute

Trees are a great way to beautify our parks. Your special gift will take its place as an important part of the surroundings, without inscription, keeping true to the natural beauty of the outdoors. Native shade trees are typically used in City parks.

To explore possible location and tree options, contact the Parks Division office at (707) 543-3770. A City Arborist

will discuss appropriate tree varieties and the best planting site. Participation in the tree planting can be arranged. For best results, 15-gallon trees are planted in the cooler months between October and March. Recreation & Parks charges a fee for tree purchase (\$100). We look forward to working with you to create a special commemoration.
